Skills

React.js, Redux, JavaScript, Python, HTML, CSS, SQL, postgreSQL, Sequelize, SQLAlchemy, Express, Adobe Illustrator, Adobe Photoshop, Adobe Premiere, Adobe After Effects, AWS, Heroku, Autodesk Maya, Unreal Engine.

Projects

HelperNotes live site | github

JavaScript, React.js, Redux, HTML5, CSS3, Express, PostgreSQL, Sequelize, Heroku

Project Description

- Helper-Notes is a clone of EverNote web application which lets you create notes and edit them with its rich text editing tool. To organize better, users can create notebooks to store notes in it.
- Notes and Notebooks features are full CRUD functionality, meaning; users can create, read, update and delete Notes and Notebooks with their convenience.
- This application was built with Postgresql as a database management, Express as a backend engineering and React Js as a front-end tool. Javascript was the primary language used.

Flixtagram live site | github

Python, JavaScript, React.js, Redux, HTML5, CSS3, Flask, SQLAlchemy, AWS, Heroku, Agile Scrum boards, Git

Project Description

- Flixtagram is a clone of an Instagram app where users can post pictures with captions. Users can follow other users to see their posts.
- This app was built by the collaborative effort of me and my three partners. Backend engineering is built with Flask app, Python and Postgresql for data management.
- Front-end engineering is handled with the help of React Js and Redux framework.

Sharate-it live site | github

Python, JavaScript, React.js, Redux, HTML5, CSS3, Flask, SQLAlchemy, AWS, Heroku, Agile Scrum boards, Git

Project Description

- Sharate-it is an app where a user can list their business to promote and customers can leave their reviews based on the experience. Business listers can upload pictures of their businesses.
- Uploading pictures has been handled by AWS S3 bucket. Backend engineering is built with Flask app, Python and Postgresql for data management.
- ReactJs and Redux framework was used to handle Front-end development.

Experience

3D Artist | May 2020 - September 2021

Roebuck Media

- Created VR experiences *1947* and *Apollo 11* rendered in Unreal Engine which vowed more than 10,000 audiences visited Spaceport Roswell (VR Arcade) and receiving positive reviews on Google Reviews with 4.8/5 stars.
- Created elegant 3D assets and animations using Maya, Zbrush and other tools to make VR experiences high quality and enjoyable.

Teacher's Assistant (Motion Graphics) (Part-Time) | January 2018 - May 2020

Creative Media Institute, NMSU

- Research on new tools for Adobe After Effects and help and supervise the batch of 17-18 students with lessons and solving problems.
- I troubleshooted some unique technical problems that students would encounter.

Education

App Academy | September 2021 - May 2022 | Online Cohort

Immersive software development course with focus on full stack web development

New Mexico State University | Jan 2017-May 2020 | Las Cruces, NM

Bachelors in Animation and Visual Effects
